

## NÄTANALYSATOR FÖR PANELMONTAGE

DMG7000, 7500, 8000, 9000

DMG7000

Nätanalysator med widescreen färg LCD. Expanderbar med 3 EXP moduler.

- Widescreen colour LCD 4,3"
- Expanderbar
- NFC konfiguration
- Kompatibel med EASY BRANCH SYSTEM

### PRODUKTBESKRIVNING

2022 är året då vi utökar vårt sortiment från Lovato med en nyutvecklad nätanalysator. Lovatos nya serie nätanalysatorer finns i fyra olika utföranden från DMG7500 till DMG9000, där alla modeller har en uppdaterad widescreen med LCD färgdisplay. Med hjälp av färgdisplay och tydliga tryckknappar kan man enkelt hantera och läsa av analysatorn i tuffa miljöer.

För att underlätta användandet av analysatorn kan du programmera LED indikatorer på produktens display. Här kan du för att anpassa produkten efter ditt egna behov styra vad de olika LED indikatorerna signalerar. Till exempel status av digitala ingångar eller utgångar, pågående kommunikation och indikation av energikonsumtion.

Nätanalysatorerna har också inbyggd PLC logik, med hjälp av detta kan analysatorn utföra enkla funktioner kopplade till timers, alarm och digitala ingångar. Dessa funktioner kan du enkelt programmera med hjälp av Lovatos gratis konfigurationsmjukvara Express.

Den nya serien är även utrustad med NFC konfiguration. Tack vare NFC funktionen kan du enkelt konfigurera och modifiera parametrar i Lovatos NFC app, detta även när nätanalysatorn inte är spänningssatt. Appen är gratis och går att ladda ner där du hittar appar.

De nya modellerna från DMG7500 och uppåt är även kompatibla med Lovatos nyhet EASY BRANCH. Med hjälp av EASY BRANCH kan du spara både tid och pengar vid installationer där du har flera mätpunkter.

Vid jämförelse av vanliga mätinstrument och EASY BRANCH minskar du inte bara antalet av dragna kablar utan även risken för felkoppling, och tack vare RJ45 kopplingen blir lösningen i princip idiotsäker!

För att bygga ett EASY BRANCH system använder du följande produkter:

- Nätanalysator DMG7500 - 9000
- EXS0000 Busmodulen för EASY BRANCH
- EXS4... mätmodul för strömtransformatorer och automatsäkringar
- EXS1-3.... för elektronisk mätning av automatsäkringar eller passande strömtransformatorer.

Tillsammans kan lösningen mäta upp till 33st 3-fas laster eller 99st 1-fas laster.

Modulerna EXS1... och EXS3... för elektronisk mätning har en självigenkänningsfunktion tillsammans med strömmodulen den är ansluten till. Detta underlättar för installatören som då ej behöver ställa in primärströmmen för strömtransformatorn eller typ av koppling (1-Fas, 3-Fas). LEDen indikerar den korrekta spänningen på den elektroniska strömtransformatorn, medan en LED på EXS4000 modulen indikerar att den är korrekt kopplad.

För att göra hela installationen ännu enklare behövs heller inga speciella kablar - en standard Cat.6 Ethernet kabel är allt som krävs.

Traditionell mätning jämfört med EASY BRANCH

Vid en mätning av 4st 3-fas laster som är övervakade i en elektronisk panel:

- EASY BRANCH: 1 Nätanalysator, 1 EXS0000 busmodul, 1 EXS4000, 4 elektroniska strömtransformatorer och enbart 5 Ethernetkablar.

- Traditionellt system: 1 HMI, 4 nätanalysatorer, 12 strömttransformatorer, 32 kablar.

## POWER ANALYZERS WITH WIDESCREEN COLOUR LCD DMG SERIES

**WIDESCREEN COLOR LCD**  
The large size of the colour LCD (4.3") allows for the optimal view of measures and parameters in a clear, simple and intuitive way.  
The standard cutout dimensions (92x92mm) ensures a perfect compatibility with the usual front panel solutions.

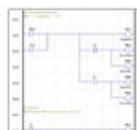

**10 LANGUAGES**  
The language shown can be selected from a large number of choices: English, French, German, Italian, Spanish, Portuguese, Polish, Russian, Czech, Chinese.

**PROGRAMMABLE LEDs**  
3 front LEDs are programmable and let the user know the status of the device at any time: alarm programmed by the user, status of digital inputs or outputs, emission of pulses indicating energy consumption, communication in progress.

**HIGH ACCURACY LEVEL FOR MEASUREMENTS**  
The measurements are verified according to the recognized international standards for measuring instruments: IEC 62053-22 (class 0.5s), IEC 62053-24 (class 1) and IEC 61557-12 (class 0.5).

**PLC LOGIC**  
Thanks to the built-in PLC logic, the power analyzers can perform simple automations related to timers and alarm states and digital inputs. Programming with "contacts" (Ladder) is simple and intuitive thanks to the use of Xpress configuration software.

### NFC CONFIGURATION

Thanks to NFC technology, it is possible to configure and modify parameters (even when the device is not powered) through Nete LOVATO App, which can be downloaded for free from the Google Play Store and App Store for Android and iOS smart devices.

## EVERYTHING UNDER CONTROL!

### MEASUREMENTS

DMG power analyzers display all the measurements useful for a complete check of the electrical network. The voltage measurement input does not require external transformers up to 600VAC.

Waveforms

Polar diagram

Currents

Energy consumption control

### EXPANDABILITY

Possibility to add up to 3 EXP... series expansion modules (additional inputs, outputs and communication ports).

### DEGREE OF PROTECTION: IP65

Possibility of use in harsh environments thanks to the gasket on the back which guarantees the IP65 degree of protection.

### INTEGRATION WITH SIGNALS FROM THE FIELD

Thanks to the EXP... expansion modules it is possible to add **digital** and **analog inputs** by which field measurements such as gas or water consumption, tank levels, temperatures, pressures and much more are integrated into the data collection in order to obtain a complete energy management.

### COMMUNICATION

Availability of models with built-in RS485 and Ethernet communication ports.

### OPTICAL PORT

The optical port compatible with the communication devices CX01 and CX02 is available and allows, thanks to Xpress software, the parameter configuration, the electrical network diagnostics and the firmware update of the power analyzer.

### EASY BRANCH POWER MONITORING SYSTEM

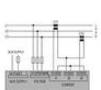

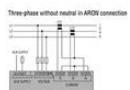

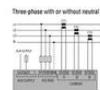

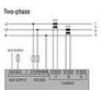

Thanks to the EXP... modules, a simplified and very fast wiring can be achieved in panels where it is necessary to read the electrical parameters of different loads, drastically reducing the costs and the installation times.

## POWER ANALYZERS WITH WIDESCREEN COLOUR LCD DMG SERIES

### WIDESCREEN COLOR LCD

The wide screen is designed for the optimal view of measures and parameters in a clear, simple and intuitive way.

### EXPANDABILITY

Possibility to add up to 3 EXP... series expansion modules (analogical inputs, outputs and communication ports).

### DEGREE OF PROTECTION: IP65

Possibility of use in harsh environments due to the gasket on the back which guarantees the IP65 degree of protection.

### 10 LANGUAGES

The language chosen can be selected from a large number of choices: English, French, German, Italian, Spanish, Portuguese, Polish, Russian, Czech, Chinese.

### PROGRAMMABLE LEDs

3 front LEDs are programmable and let the user monitor the status of the device. They can also be used as digital inputs or outputs, emission of pulse signals, including energy measurement.

### HIGH ACCURACY LEVEL FOR MEASUREMENTS

The measurements are verified according to the recommended international standards for measuring instruments: EC 60205-22 class 0.5a; EC 60205-24 class II and EC 60205-13 class 0.5.

### NFC CONFIGURATION

Thanks to NFC technology, it is possible to change the configuration of the device even if the device is not powered through WiFi (WLAN). The app, which can be downloaded for free from the Google Play Store and App Store for Android and iOS smart devices.

### NFC

### PLC LOGIC

Thanks to the built-in PLC logic, the power analyzer can be controlled by external logic signals such as gas or water consumption, temperature, pressure and much more are integrated into the data collected in order to obtain a complete energy management.

### INTEGRATION WITH SIGNALS FROM THE FIELD

Thanks to the EXP... expansion modules it is possible to add digital and analogical measurements such as gas or water consumption levels, temperatures, pressures and much more are integrated into the data collected in order to obtain a complete energy management.

### COMMUNICATION

Available by default are built-in RS485 and Ethernet communication ports.

### OPTICAL PORT

The optical port compatible with the communication devices CNET and CNET-PRO allows the parameter configuration, the electrical network diagnosis and the firmware update of the power analyzer.

### EASY BRANCH POWER MONITORING SYSTEM

Thanks to the EXP... modules, a simplified and very fast installation is possible (no junction boxes are necessary to make the electrical connections) thus drastically reducing the costs and the installation times.

## EVERYTHING UNDER CONTROL!

### MEASUREMENTS

DMG power analyzers display all the measurements useful for a complete check of the electrical network. The wide screen is a very useful tool to better understand the state of the system.

### CHARTS AND HARMONICS

The electrical measurements are shown with waveform charts, polar diagrams and representations of the harmonics. All these features are available in a single screen.

### STATISTICS

The DMG8000 model also provides statistics on the quality of the network according to the IEC 60205-24 standard (voltage dips, overvoltages, interruptions, low frequency rates and much more).
